

## **Abstract**

**Title:** First aid in drowning - knowledge and methodology of teaching pupils of the second grade of elementary school

**Objectives:** The aim of this work is to determine the theoretical knowledge of first aid for drowning man of students in the second grade of elementary schools and to create a model lesson suitable for these students.

**Methods:** In the theoretical part of thesis was used research of literature in the first aid and water rescue. The research was conducted by interviewing, the form of survey. Analysis method (Non-numerical one-dimensional analysis) was used for sorting the information which were obtained, synthesis metod was used in their summary.

**Results:** The knowledge of pupils at our elementary schools, picked by us, about the safety rules of water behavior is sufficient. On the other hand, knowledge of specific first aid to drowning man is insufficient. In some cases, there were answers which had more than 90% success, but in the basic questions about behaviour in specific situations, almost 2/3 respondents answered badly.

**Keywords:** First Aid, Water Rescue, Framework Educational Program.
